

## Day 1: Tuesday 26<sup>th</sup> April 2022

---

- 12:30-13:00     **Welcome and Introduction**
- 13:00-15:00     **Keynote Presentations**
- What data and methodologies are needed to provide insight into the steel decarbonisation challenge?
  - How do the world's leading steelmakers view the decarbonisation challenge?
  - What is the view of the leading mining companies supplying steelmaking raw materials?
  - How can steel product consumers understand the overall carbon footprint of their suppliers?
- 15:00-15:30     Speed networking
- 15:30-16:00     *Break*
- 16:00-16:30     Highlight presentation:  
**Spotlight on hydrogen steelmaking**
- 16:30-17:30     Panel discussion:  
**Understanding the decarbonisation solution landscape**  
Senior representatives of steelmakers and leading technology providers discuss the options available to achieve decarbonisation of the steelmaking process.
- What technological developments could dramatically change the picture in steel decarbonisation?**
- What is the timeline for delivering industrial scale, zero carbon steelmaking?
  - What companies are advancing these technologies and their implementation?
  - What are the costs, roadblocks or other ultimate limits to these strategies?
  - How might carbon capture and utilization be applied to the steel value chain?
- 17:30             *Close of day*

All timings quoted in UK GMT.

Please consider provisional, timings topics and speakers mentioned are subject to change.

## Day 2: Wednesday 27<sup>th</sup> April 2022

---

12:30-13:00 Highlight presentation:  
**COP26 outcomes and implications for the steel value chain**

13:00-14:30 Panel discussion:  
**Steel Decarbonisation Policy Developments**

Senior representatives of global policy makers and experts from around the world discuss their approaches to encouraging the decarbonisation of steel making and mining.

**Designing policy to support decarbonisation of this critical commodity?**

- What are the implications of different government targets and likely policy pathways?
- How might different national and regional responses impact global trade flows in the value chain?
- Can policy consider global measures that matches the international nature of steel value chains?

14:30-15:00 Highlight presentation:  
**European steel industry leadership perspectives**

15:30-15:30 *Break*

15:30-16:00 Highlight presentation:  
**US steel industry leadership perspectives**

16:00-17:30 Panel discussion:  
**Steel Decarbonisation In Action**

Senior representatives of steelmakers and leading technology providers discuss the options available to achieve decarbonisation of the steelmaking process.

**What steps are the leaders in steel value chain taking to reduce emissions today?**

- What energy efficiencies or process optimizations can be made across the value chain?
- How can the energy needs of a green steel industry be supplied sustainably?
- What proportion of steel production can be made using scrap or low emission feedstocks?

17:30 *Close of day*

All timings quoted in UK GMT.

Please consider provisional, timings topics and speakers mentioned are subject to change.

## Day 3: Thursday 28<sup>th</sup> April 2022

---

- 12:30-13:00 Highlight presentation:  
**Understanding carbon capture, storage and utilization**
- 13:00-14:30 Panel discussion:  
**Facilitating Investment and Trade in a decarbonised steel value chain**
- Representatives from across the finance and investment community discuss the tools available to enable the required in decarbonisation strategies.
- How are sustainability considerations shaping investment in the steel value chain?**
- What impact are carbon emissions considerations having on steel equity and investment ratings?
  - What does sustainable investing mean for project finance in new mines, steel mills or processing plants?
  - Is there standard practice among investors on how they assess carbon risk?
- 14:30-15:00 Highlight presentation:  
**Deep dive on global scrap & metallics market dynamics**
- 15:00-15:30 *Break*
- 15:30-16:00 Speed networking
- 16:00-17:00 Panel discussion:  
**Demystifying carbon markets and offset strategies**
- Senior representatives of leading players in the carbon market space discuss how the offset of steel value chain emissions via market instruments will play a part in an effective decarbonisation transition.
- What market strategies are available to control carbon risk?**
- What carbon pricing mechanisms are required to make decarbonisation investment viable?
  - How are companies balancing offsets with investment and process change?
  - What are the key considerations in the design and action of offset strategies?
- 17:30 *Close of conference*

All timings quoted in UK GMT.

Please consider provisional, timings topics and speakers mentioned are subject to change.
